This paper presents a set of algorithms for efficiently evaluating join queries on sensor networks. We describe and evaluate three algorithms that take advantage of the fact that the algorithms are capable of running ...

The purpose of this paper is to design and implement a dynamic test platform for the characteristics of battery-powered motorcycles (BPMs). A roller of the test system is driven through a torque sensor, and a controller ...

Keywords: battery-powered motorcycle, kinetic energy recycle, road p

Bibliometrics: Downloads (6 Weeks): n/a, Downloads (12 Months): n/a, Downloads

In this paper, we give a general criterion to determine when a complex space-time block code has a cyclic structure and then we provide a complete list of complex space-time block codes of size 4.

Keywords: Finite groups, Space-time block codes, Twisted group algebras
